Copy Content from Learning Modules of A Course/Group

You can copy in select items or all of the content from the Learning Modules of a course in ANGEL. Please follow these steps.

1. Open the course that will receive the content. Make sure you are in the correct course by referring to the course title displayed across the top, and the Learning Modules content.
2. Click the Learning Modules tab. Note that newly created semester courses will be empty, no content under the Learning Modules.
3. Select Add Content
4. Select Import from a Course or Group
5. Expand the folder of the course you want to copy in. Click the + in front of the course folder to do this.
6. Check the items you want to copy in. You will need to click on the + in front of folders to drill down to specific items in folders.
7. Click the Copy button.
8. Click Done when the items have been copied.

The example screen shot below shows steps 5-8.
